I believe that my property was contaminated because in 1964 and for several years after there was an Esso Station on the property. The tanks that were on the property that were owned by the station were not maintained properly and developed leaks. The soil was tested by DHEC in 1998 and high levels of contamination were found. The contamination was found to have spread for several thousand feet from the original site of the four holding tanks. I have documentation from DHEC and Terry Environmental Services in Summerville, SC to back up my claims.
